

Map sensor

The pressure and temperature sensor type ABS400KPA flooded with epoxy resins, which gives 100% robustness and increases mechanical vibration and overload strenght.

Technical specification

- Voltage Range: 9-16V (nominal 12V).
- The output voltage of pressure sensors: 0-5V.
- The measure range of pressure sensors: 0-400kPa.
- The maximum overload of pressure sensors: 1600kPa.
- The temperature sensor type NTC 4k7.
- Leak-free connection type AMP (5 pin).
- The operating temperature limits of gas temperature sensor from -25°C to +120°C.
